Subject Fw: Urgency Broadcasts (Division of the 25th Latitude)

Pls print.

SLRC/Committee approved rollout of the notifications yesterday (tomorrow).

Transmissions UB_1.01 to UB_1.04 are attached.

We're proposing a launch for an initiative in [REDACTED] on 15 Feb. Looks like it is very well-timed given the vulnerability mapping and the implications for property insurance -- ground floors being rezoned as substructures. Our team is off to [REDACTED] Jan. 23–24 to nail down open operational details with the coalition so we'll be ready to go for the launch.

FYI — [REDACTED] and private sector have told RP that X should withdraw and they would support RP staying til 7 Feb. mapping the freshwater capillaries.

Problem — last week's storm pushed toxins from industrial sites I99 V1-V30 into the Aquifer.

WJE informed us of unexpected seepage in fourteen of fifteen wells of Northwest Wellfield — looks like the drinking water may be first to go.

Capital budget hasn't been approved yet, so we've got desalination for tax zones [REDACTED] only.
Thoughts?

This is big. Told TNMF and B0036 to draft statement calling for calm.

Refer to the protocol in the Code, Section IV, ARTICLE II. Sec. 251-73 (SLR and RRC)

I have called the Tallahassee camp telling them that she needs to get on SSB radio telling people not to pillage.
Peaceful demo OK; pillage is not.

[REDACTED]
[REDACTED]
[REDACTED]
[REDACTED] what do we tell them?
